"In the middle of the BLOODHOUND SSC is the MCT V12 800 bhp race engine which doubles as our APU delivering hydraulic power as needed, starting the EJ200 and of course pumping the High Test Peroxide (HTP) through to the Falcon rocket. The pump has to move a ton of HTP through to the rocket catalyst in 22 seconds and at 1200 psi."

The screenshot shows a forum post in a Windows Internet Explorer browser window. The browser title is "Ultimatecarpage.com forums - View Single Post - Bloodhound SSC: 1000mph LSR project...". The address bar shows the URL "http://zigwheels.com u...". The forum post is titled "View Single Post" and is from the thread "Bloodhound SSC: 1000mph LSR project...". The post is dated "10-24-2008, 02:58 AM" and is post #14. The user profile for "Matra et Alpine" is visible, showing a car image, a "Supporting Member" status, and a join date of "Dec 2003". The post content includes the quote from "ruim20" and the text "from the links provided ...." followed by the detailed description of the MCT V12 engine. Below the text is a technical diagram of the engine, which is a V12 configuration. The diagram shows the cylinder arrangement and various components like the crankshaft and pistons. A "Quote" button is visible at the bottom right of the post content area.
